	Proof assistants miniF2F, LeanDojo	**Solver in the loop** Logic-LM, LINC	**Specs from text** nl2spec, Clover	**Faithfulness checks** FormalAlign, ReForm
Checks	the proof compiles and closes	solver's answer against the answer key	the spec against the code	the formula against the text
Decided by	the proof assistant	the answer key	a verifier, or a human	a trained scorer, candidate agreement, or a human
Faithful to text?	not checked	not checked	left to a human	estimated
This talk				**decided by a solver**
